ONLY AT **CHARLOTTE**

At the core of every great city is a great university. UNC Charlotte is Charlotte's great university. Our modern campus and thriving city create opportunities for 49ers to have unparalleled experiences to drive change and make an impact.

At Charlotte, you'll be part of a dynamic learning environment where groundbreaking research isn't just for graduate students—undergraduates actively contribute to discoveries that shape industries, communities and the world. Our vibrant city offers internships, networking and career-launching opportunities with top employers, ensuring your education extends beyond the classroom.

As a 49er, you'll benefit from the affordability of a public university, the high-quality education of our urban research institution and the diversity of our student body. You'll graduate with a highly valued degree, a wealth of experience and the confidence to shape your future—whether in Charlotte or beyond.

IGNITE YOUR GREATNESS AT [ADMISSIONS.CHARLOTTE.EDU](https://admissions.charlotte.edu)

JAIRUS COOK

Class of 2026 / Mechanical Engineering

"When I toured UNC Charlotte, I really felt the personal atmosphere of the school. I felt like it had a small-school feel to it, even with how large it is... I still feel that way. Being at Charlotte has really helped me to grow as a person. I've been able to connect with so many types of people and create lasting friendships here. Even more than that, I've had the space to learn about myself and figure out what I want out of my career and life in general.

My favorite aspect of the mechanical engineering program at Charlotte is the hands-on projects built into the design courses. From machining parts to designing and building a robot, the hands-on activities are exciting and they really help to solidify the knowledge I learn in the classroom."

FORGING THE FUTURE

SUMMER NEWBY

Class of 2025 / Management Information Systems

"I am in the first generation in my family to go to college and I believe the generations after me will have an easier and smoother transition into college because I took the plunge.

My dream is to help people from all backgrounds know that even when it seems like you can't do something, you can. It might take longer than some and you might have to work harder than some, but you can achieve your goals. I believe that UNC Charlotte gives students the opportunity to enact change all the time. This year, I have the opportunity to be an Orientation Counselor and I hope that I can encourage and excite incoming students and help them feel more comfort in their journey to Charlotte."

ENACTING CHANGE

Study in a place where on-campus research comes to life in Charlotte's communities, businesses and industries

CHARLOTTE OFFICIALLY BECAME AN R1 RESEARCH INSTITUTION THIS YEAR!

OUR THRIVING CITY

The Light Rail extension allows convenient access to Uptown Charlotte for internships, performing arts, sporting events, restaurants, festivals and more. Our increased connection to the city is revolutionary for students, staff, alumni and visitors.

ANTHONY ISMAEL ARGUDO

Class of 2027 / Criminal Justice

“Charlotte gave me the opportunity to become the best version of me, giving me the access to quality education and programs to be involved with. The variety of teaching methods, classes and activities made a huge personal impact, as well as the kind, gentle and courteous students that help make each class more unique than the last one.

Currently as a Passport Leader in the Passport Program I made strong personal bonds with the peers I work with, as well as the people I met at soccer and volleyball. They made me feel that I belonged and that I matter and that no matter what program I join, the students and staff will genuinely ensure that you belong as a Niner.”

TURNING POTENTIAL INTO REALITY

CASSIE BROADHEAD

Class of 2025 / Psychology

"Here at Charlotte, I have overcome my desire to take the path well-traveled. There are more exciting things to be unveiled that you will not discover by staying stagnant or living life on the safe side.

I had to put myself out there and in that process, I discovered a new home hundreds of miles away from my original home.

During my time here, I have grown into a better leader, but also a better follower. I have learned that there are things I do not know, that my peers and professors are experts at. This knowledge has allowed me to take a step back and follow the lead of those around me and only lead when I am well-informed and well-equipped to do so."
